

METHODS FOR CALENDARING, TRACKING, AND EXPENSE
REPORTING, AND DEVICES AND SYSTEMS EMPLOYING SAME

ABSTRACT OF THE DISCLOSURE

A computerized integrated method for determining expenses related to travel includes storing a plurality of appointments at a plurality of different locations, tracking a physical location of a user in realtime to the plurality of appointments, and automatically assigning expenses to least one of the plurality of appointments based on the tracking of the physical location of the user to the plurality of different locations. For example, mileage expenses, credit card purchase expenses, and airplane, train and hotel expenses, may be automatically linked and assigned to the particular appointment. The method may be incorporated in handheld devices such as personal digital assistants. The method may also be provided as a subscription service to businesses and leisure travelers.
